

Self-touring's Best Friend

Self-touring has never had a better platform, the Oaks Smart Lock is fully compatible with Rently's patented self-touring technology.

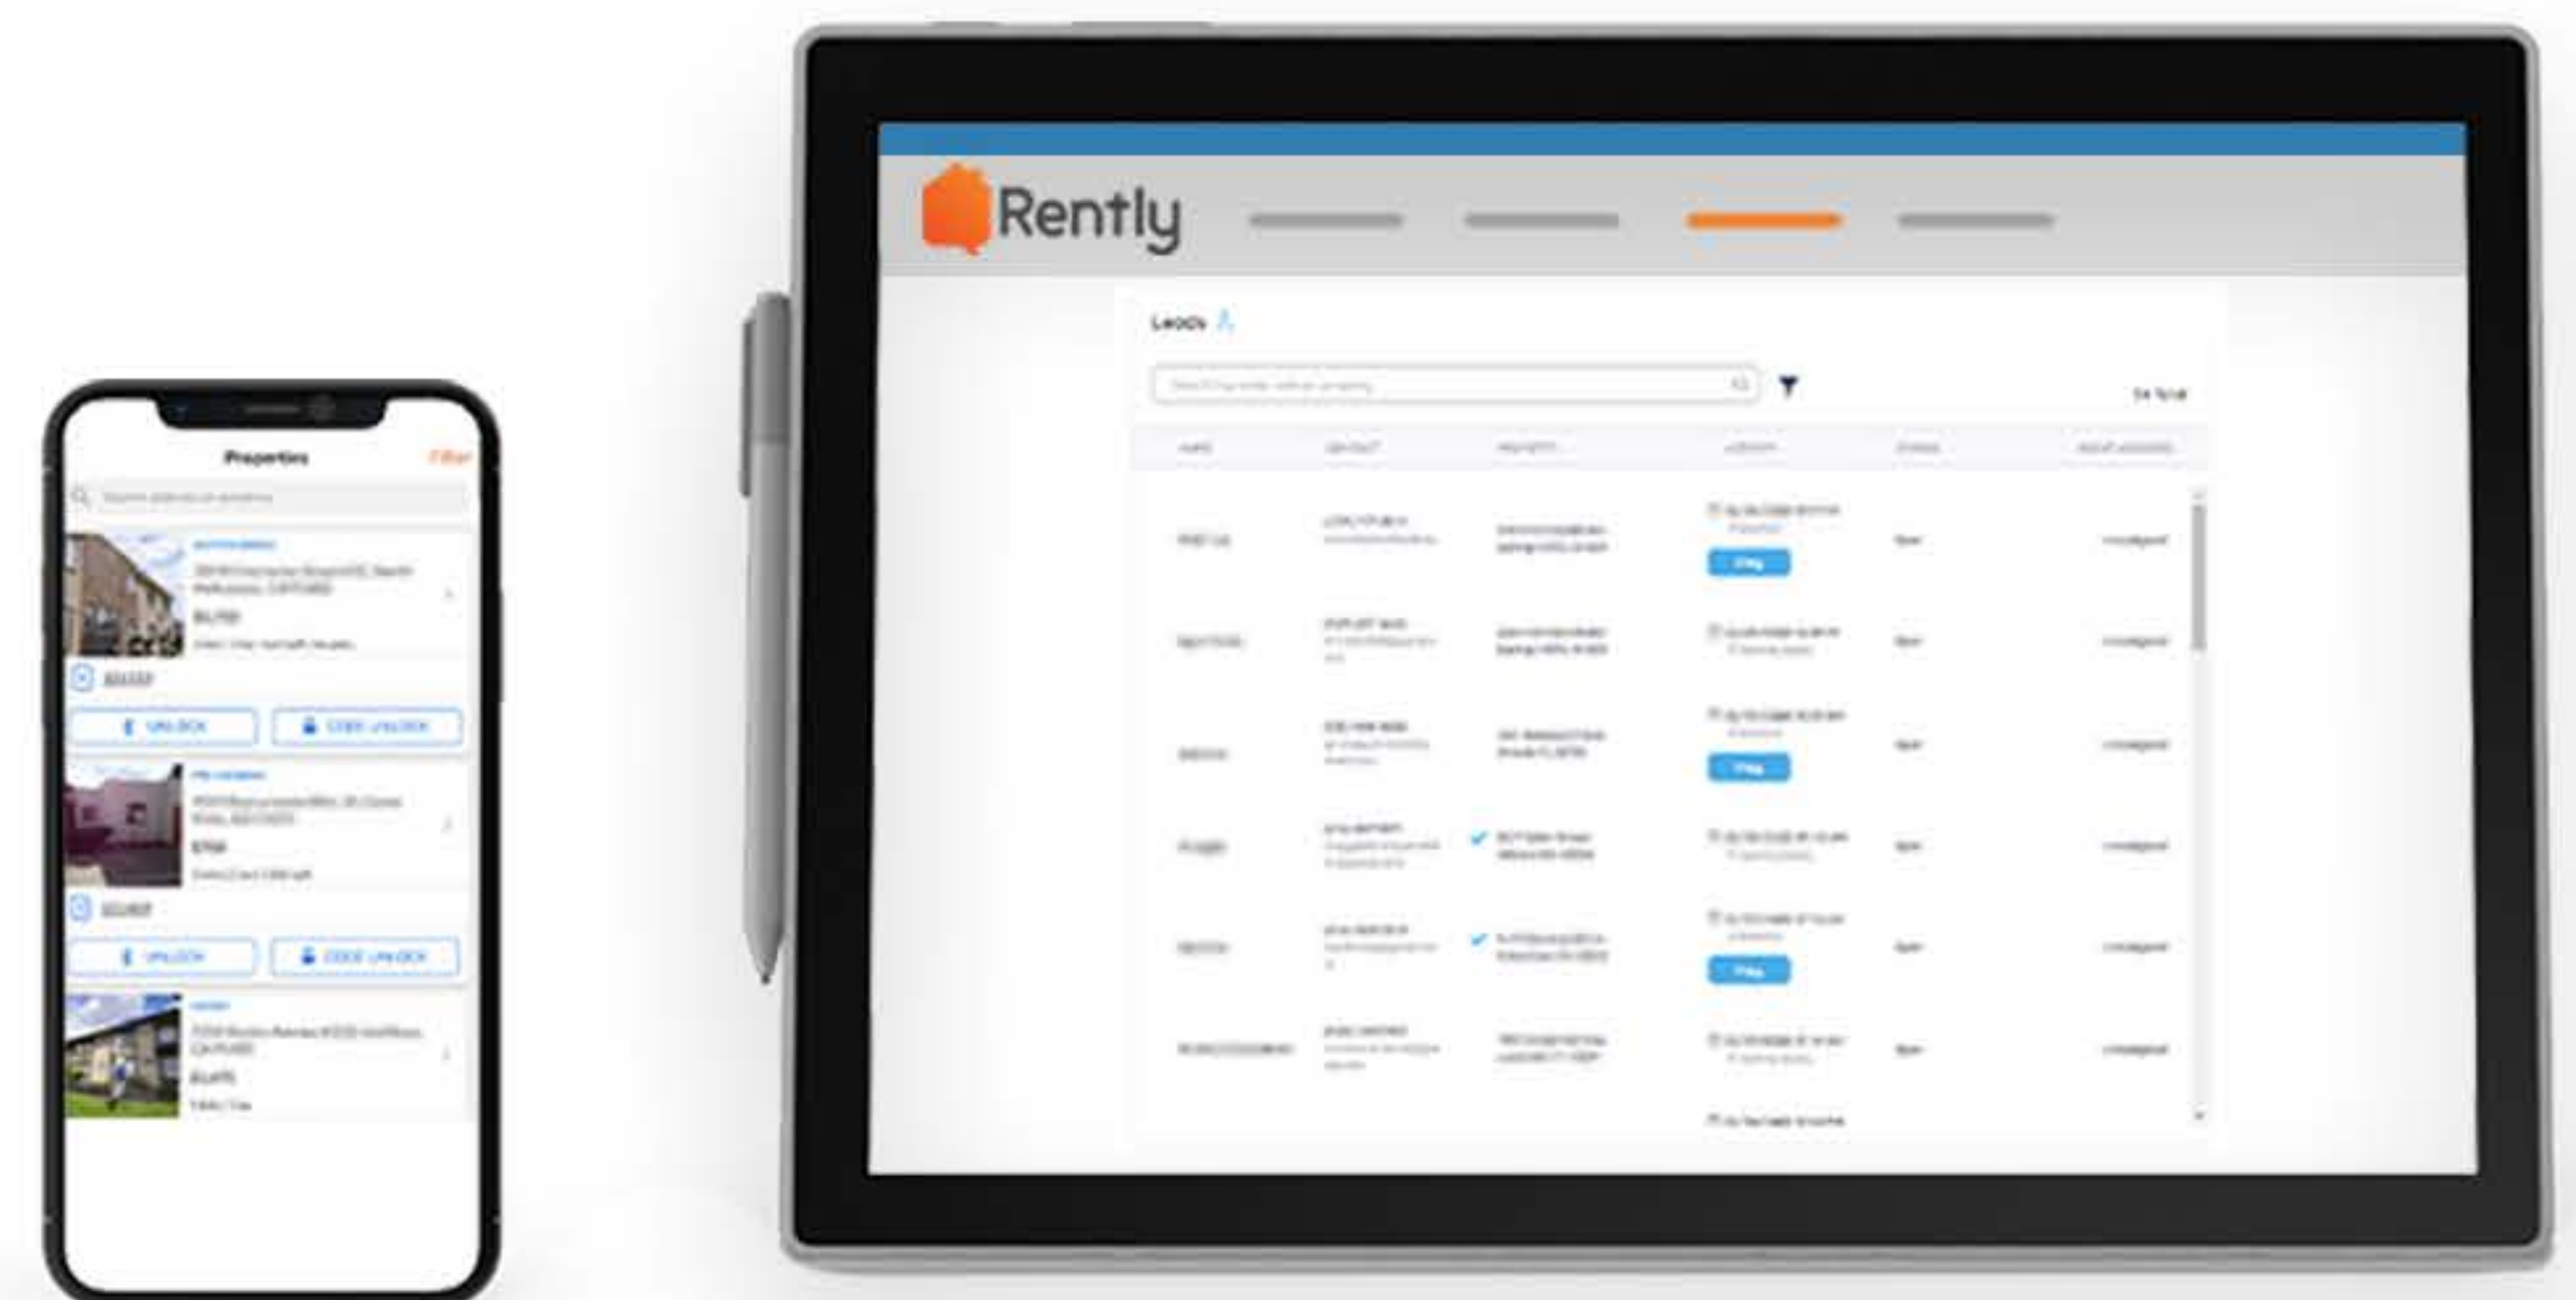

Prospects can register for a self-tour online and will receive a one-time entry code to tour your vacant property without an agent.

Leasing is easier than ever

Self-touring is a patented technology that makes the leasing process a breeze. Easily manage leads and vacant properties from the **Rently** portal.

Every prospective renter is vetted through 6 layers of security including selfie check, credit authentication, and AI-powered fraud detection before they can tour one of your properties.

Easily hand off to residents

The Oaks Smart Lock provides state-of-the-art Bluetooth lock technology for hassle-free access to rental properties with simple hand off to the resident.

Replace archaic key-based locks with digital keys issued from the robust Rently management portal.

Smart access is only the beginning...

Code Access

Providing code access is not only more convenient, but more secure.

Smart Work Orders

Allow your renters to digitally request service on their unit through the app.

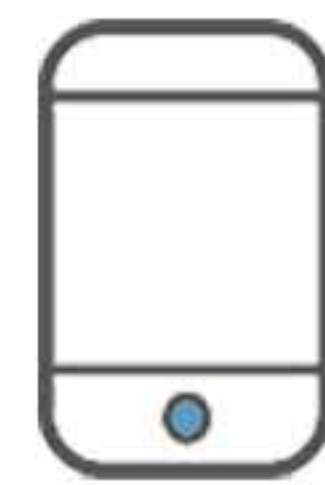

1 Year Battery Life

Low battery alert on app when battery is lower than 25%

Say Goodbye to Re-keying

Digitally re-key your lock from the Rently Manager app.

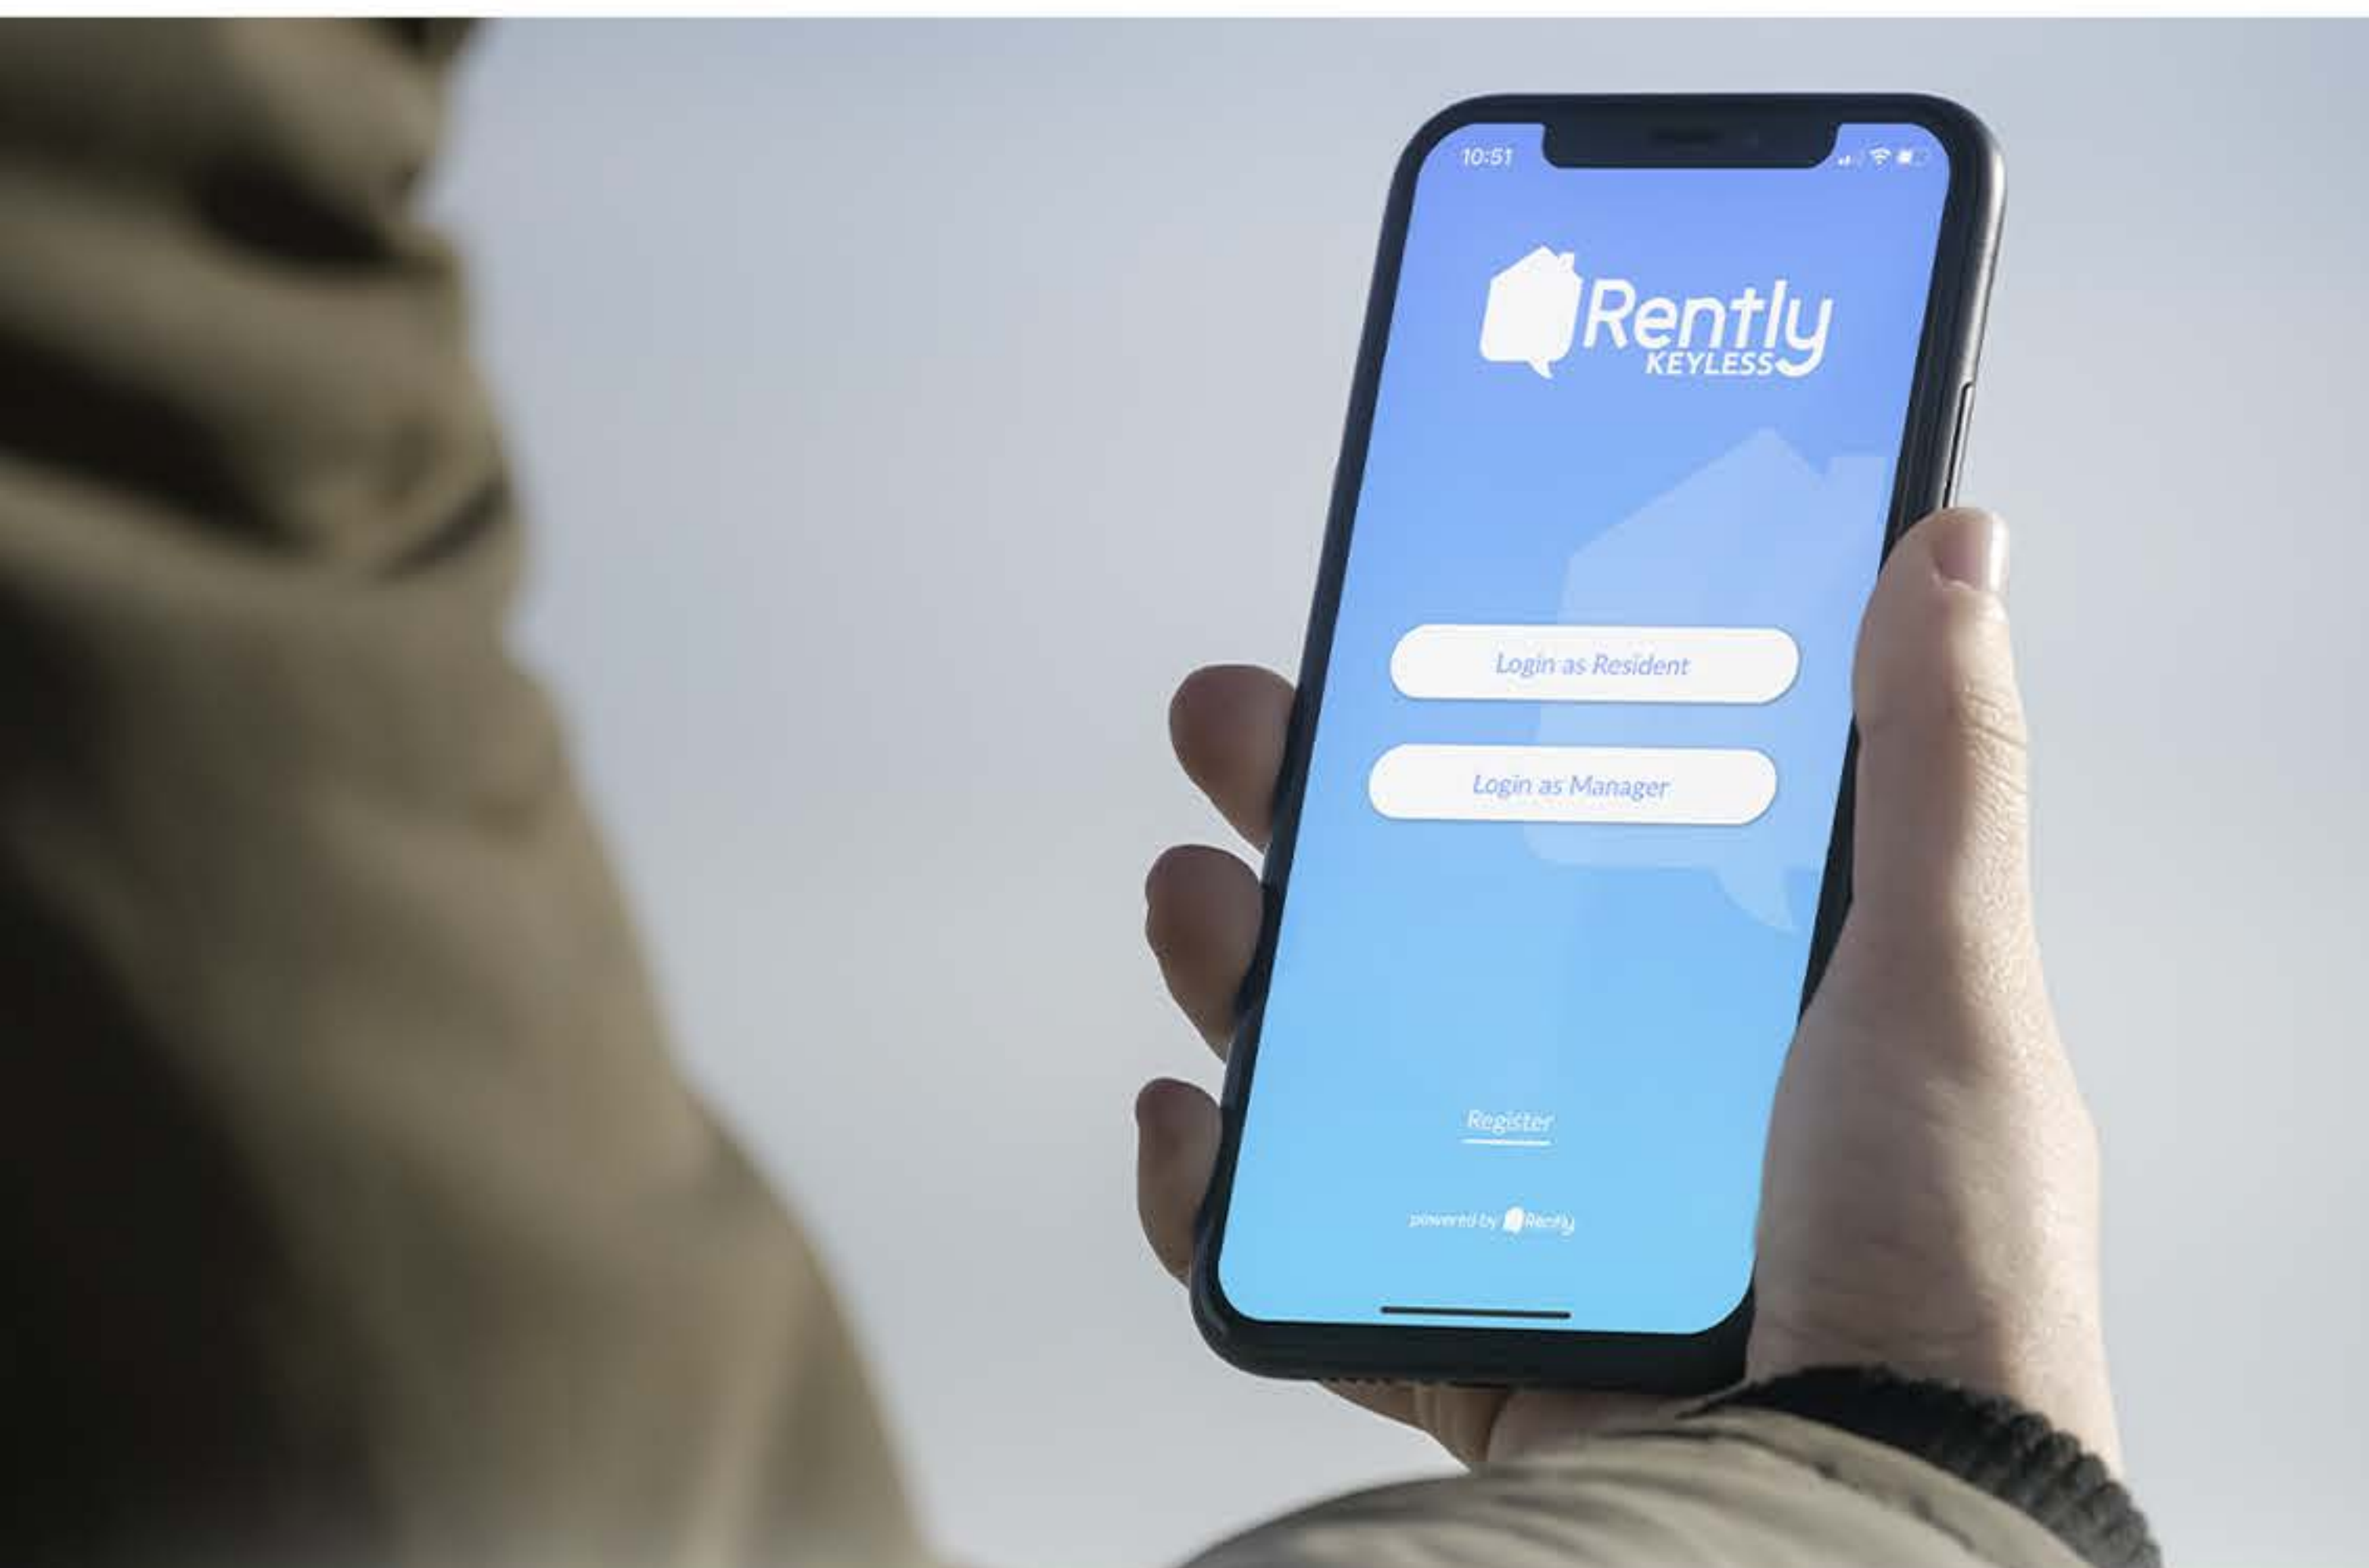

Eliminate Key Management

Smart keys are a simple & convenient way to grant access for residents.

Secure and Reliable

High quality deadbolt with battery backup start

The Ultimate renter experience

Provide renters with our smart phone app and grant them instant access to world class access technology.

It can't get much easier than that.
